

FOLLOW OUR GOOD NAME!

Welcome to the SCC GmbH team: We are one of Europe's biggest consultancy companies in the regulation sphere, a respected partner of the chemical industry, and, for more than 130 experts from different countries, a professional home. Our passion: managing registration and approval procedures for chemicals such as agrochemicals, pesticides, biocides, etc. Our goal: to grow even further, in an international client environment. In the personal, open working culture of a family business that is focused on caring for its team. Located at the heart of the Rhine-Nahe region, alongside nature, but also right next to the vibrant Rhine-Main area. Expand our scientific expertise as

TOXICOLOGIST (M/F/D) - REGULATORY AFFAIRS

BAD KREUZNACH

WHAT YOU CAN EXPECT

- Your path is taking you into a team of currently 20 people – and right into our enormous diversity of projects
- Your task: assessment of toxicological properties (hazard evaluation and CLP) of various substances mainly in the field of biocides
- Your mission: in collaboration with your colleagues you will prepare exposure and risk assessments, evaluate potential endocrine effects, plan/coordinate studies and engage in various regulatory projects
- Your focus: to obtain approvals/authorisations for our client's active substances/biocidal products in the European market

WHAT WE OFFER

- Opportunities for personal development
- Intensive on-the-job training and flexible working hours
- An attractive salary with profit-sharing, bonuses and benefits (company pension plan, food allowance, etc.)
- A very good working atmosphere in a team supported by corporate events and socialising outside of work (not currently because of the Corona Pandemic)

WHAT YOU OFFER

- Science degree in natural sciences (e.g. toxicology, food chemistry, biochemistry, biology or related scientific disciplines)
- Preferably at least 2-3 years' experience in Toxicology & Human Health Risk Assessments and in the sphere of regulation (with a focus on biocides)
- Ideally additional qualification as a certified expert in toxicology
- Ability to tackle and coordinate complex toxicological issues effectively
- A talent for organisation, goal orientation and awareness of deadlines
- Strong communication and presentation skills in German and English

Do you thrive on challenging projects in an interdisciplinary team of ambitious professionals? Then apply online via the link below!
