

FOLLOW OUR GOOD NAME!

Welcome to the SCC: We are one of Europe's biggest consultancy companies in the regulation sphere, a respected partner of the chemical industry, and, for more than 140 experts from different countries, a professional home. Our passion: managing registration and approval procedures for chemicals such as agrochemicals, pesticides, biocides, etc. Our goal: to grow even further, in an international client environment. In the personal, open working culture of a family business that is focused on caring for its team. Located at the heart of the Rhine-Nahe region, alongside nature, but also right next to the vibrant Rhine-Main area. Expand our scientific expertise as

(IN SILICO) TOXICOLOGIST (M/F/D) – REGULATORY SCIENCE

BAD KREUZNACH

WHAT YOU CAN EXPECT

- Your path is taking you into a team of currently ten toxicologists – and right into our enormous diversity of projects
- Your main task: *in silico* assessments of toxicological and ecotoxicological properties of various substances mainly in the fields of plant protection and biocides
- In collaboration with your colleagues you will generate *in silico* data and prepare *in silico* assessments in a weight of evidence approach evaluating potential toxicological and ecotoxicological effects, extrapolating data and filling data gaps (e.g. read-across)
- Additionally, you will support various regulatory projects and perform tasks such as preparation of risk assessments, evaluation of potential endocrine effects as well as planning/coordination and monitoring of studies
- Your focus: to obtain approvals for our client's products in the European market

WHAT WE OFFER

- Exciting project work with opportunities for personal development
- Intensive on-the-job training and flexible working hours
- An attractive salary with profit-sharing, bonuses and benefits (company pension plan, food allowance, etc.)
- A very good working atmosphere in a team supported by corporate events and socialising outside of work (not currently because of the corona pandemic)

Do you thrive on challenging projects in an interdisciplinary team of ambitious professionals? Then apply online via the link below!
