

The power of connected minds

Postdoc Reproduction Toxicology (m/f/d)

We are the world's leading chemical company because we offer intelligent solutions for our customers and for a sustainable future. We connect and develop people with diverse talents all over the world. For you, this means a variety of ways to advance. Not only your performance but also your personality matter to us, without regard to gender, age, origin, sexual orientation, disability or belief. At BASF, careers develop from opportunities.

Ludwigshafen is the world's largest integrated chemical complex and home to BASF Group headquarters. Located in the heart of Europe's Rhine-Neckar metropolitan region, you will find this to be an attractive place for both work and leisure time.

What you can expect

As a postdoc in our department for Experimental Toxicology and Ecology you will work with us on conducting studies concerning reproductive toxicology.

- o Therefore, you will plan and conduct animal studies for reproductive toxicology.
- o In close cooperation with our experienced scientists, you will be responsible for developing, planning and conducting toxicology studies as well as regulatory science tasks according to the agreed timelines and the budget.
- o You will be responsible for safety and compliance with legal requirements such as GLP, animal welfare and ISO.

What we expect

- o You have successfully obtained a PhD in veterinary medicine.
- o Additionally, you are familiar with experimental designs for toxicological studies in mammalian systems.
- o It is self-evident for you to use your strong communication as well as presentation skills fluently in German and English on a daily basis.
- o Working in a diverse team and managing scientific projects enhance your entrepreneurial drive and innovation orientation.

We offer

From day one you will be part of the BASF family. You will get involved in challenging fields of activity and have the opportunity to work on exciting projects in an interdisciplinary environment. Depending on the location of the respective group company you will get to know BASF and participate in various workshops and guided tours. In this way you will make numerous interesting experiences and get a deep insight into the world's leading chemical company.
