Molecular Targets group – Prof. Dr. Verena M. Dirsch
University of Vienna,
invites applications for a

Doctoral student position

We are looking for highly motivated and enthusiastic young scientists to join our research team that identifies and pharmacologically characterizes bioactive natural products, mainly in the context of metabolic disorders.

The successful candidate holds a relevant degree in Molecular/Cellular Biology, Biochemistry, Pharmacy, or a similar field.

Experience in standard cell-and molecular-biological techniques is of advantage. Interest in the field of metabolic disease, pharmacological characterisation of biologically active natural products and/or their molecular targets is expected.

Very good English and German communication skills are expected since the successful candidate will be involved in teaching (practical courses in pharmacy).

We expect high motivation, commitment and the ability to work reliably under pressure. We offer high scientific quality in our field, very well equipped laboratories with an up-to date scientific environment, interesting projects and an excellent working and social atmosphere within the group and the Department.

The University of Vienna aims at increasing the employment of women in both managing and academic positions and therefore invites applications from qualified female candidates. In the case of equal qualification female applicants will be given preference.

An application must be supported by the following documentation (all in one PDF file):

- Cover letter stating the reasons for applying
- Curriculum vitae
- Documentation of previous studies and copies of all university degrees received, preferably with a transcript of academic records

Please sent your application to application.pharma@univie.ac.at
