

Scientist Monitoring in vivo toxicity studies (m/f/d)

Our Bioscience Research Division works on innovative and sustainable solutions for our customers in sectors, such as the agricultural sector or food industry. Our goal is to improve the quality of life and protect the environment through bioscience. Our creative and diverse team embodies mutual respect and develops market-driven innovations, which make our customers successful.

RESPONSIBILITIES

Our Service unit is part of the Experimental Toxicology and Ecology department, which develops, validates and applies testing strategies to evaluate the potential toxicity and ecological impact of industrial chemicals and plant protection products.

- o As part of our team, you will scientifically monitor in vivo toxicity studies with focus on repeated dose and/or reproduction toxicity (mainly in rats).
- o In this role, you will closely interact with Contract Research Organizations (CROs) to ensure the conduct and reporting of regulatory toxicity studies in accordance with regulatory guidelines (OECD, GLP, etc.) as well as BASF's quality demands.
- o Furthermore, you will be involved in the coordination of the contract management team at our department.
- o You will closely work together with other research scientists and colleagues from BASF's regulatory toxicology groups.

BENEFITS

- o Connection to an international network of toxicologists from industry, regulators and academia.
- o Health and wellbeing programs to help you achieve better health and work-life balance.
- o Flexible work arrangements so that you can balance your working life and private life.
- o Your contribution to a sustainable future because sustainability lies at the heart of everything we do and is a driver of growth.

ABOUT US
