

Study Director Reproduction Toxicology (m/f/d)

Our Bioscience Research Division works on innovative and sustainable solutions for our customers in sectors, such as the agricultural sector or food industry. Our goal is to improve the quality of life and protect the environment through bioscience. Our creative and diverse team embodies mutual respect and develops market-driven innovations, which make our customers successful.

RESPONSIBILITIES

- o Integrated in our Experimental Toxicology and Ecology department you will plan, conduct and evaluate repeated-dose toxicity studies with focus on reproduction toxicity (mainly in rats) according to the agreed timelines and budget.
- o Fulfilling this task, you will closely work together with other research scientists and colleagues from BASF's regulatory toxicology groups.
- o Furthermore, you will coordinate internal laboratory capacity issues.
- o All studies have to be compliant with animal welfare, GLP and ISO.

BENEFITS

- o Development discussions and programs so that you can reach your full potential.
- o A secure work environment because your health, safety and wellbeing is always our top priority.
- o Your contribution to a sustainable future because sustainability lies at the heart of everything we do and is a driver of growth.
- o Onboarding to help you settle in quickly, ensuring you are part of the BASF team from day one.

ABOUT US

Do you have any questions about the application process or the job? Mrs. Angie Schenkel (Talent Acquisition) +49 302005-5166.

Please note that we do not return paper applications including folders. Please submit copies only and no original documents.

Cooperation with recruitment agencies is not accepted.

Ludwigshafen is the world's largest integrated chemical complex and home to BASF Group headquarters. Located in the heart of Europe's Rhine-Neckar metropolitan region, you will find this to be an attractive place for both work and leisure time.
